August 4, 2004

# BellSouth's Batch Hot Cut Process

- > Legal framework set up by the TRO
- > In addition to BellSouth's individual hot cut process, BellSouth has an operational and reliable batch hot cut process that has been enhanced based on CLEC input
- > There is general agreement on many aspects of the hot cut process
- > CLECs have no empirical evidence refuting the efficacy of BellSouth's batch hot cut process

# BellSouth's Batch Process Evolved from the Individual Hot Cut Process

- > BellSouth hot cut and loop provisioning processes designed with CLEC input and under PSC supervision
  - State proceedings reviewed loop provisioning and hot cut processes
    - PSC workshops
    - Georgia hot cut reconciliation process
    - Arbitrations
  - Third-party testing of provisioning processes
- > BellSouth has consistently demonstrated its ability to perform hot cuts and has exemplary hot cut performance that has been thoroughly reviewed by the nine state commissions and the FCC in 271 proceedings
- > Individual hot cut process is efficient, reliable and scalable

# Parties generally agree as to what the batch hot cut process entails

## > MCI's Definition of a Batch Process

Deposition of  
Sherry Lichtenberg  
February 5, 2004

**Q. ... Can you please affirmatively define what a batch process is?**

**A. Yes. A batch process is a seamless economic efficient process that relies on automated ordering tools and to the the extent possible, on some automation of the actual work that allows a CLEC to send -- to have multiple customers migrated on the same day without -- with a very short period of loss of dial tone, and a very short period of the inability to receive calls or activate their features.**

## > AT&T's Definition of a Batch Process

Deposition of  
Mark D. Van de Water  
February 11, 2004

**Q. Okay. So your definition of a batch provisioning process is working a set of undefined amount of hot cuts within a time window. Yes or no?**

**A. Yes.**

Pg. 75, Ln. 22-25

The parties generally agree that batch hot cut process is used to move embedded base of UNE-P to UNE-L

**> MCI Agrees Batch Process Is for UNE-P to UNE-L**

Deposition of  
Sherry Lichtenberg  
February 5, 2004

**Q. ... I just want to make sure that what the FCC is referring to as a batch hot cut process in its Triennial Review Order is the equivalent of what you are referring to as the transition hot cut process, or the batch transition process?**

**A. That is correct.**

Pg. 101, Ln. 13-18

**A. The transition hot cut process addresses the base customer that currently exist on UNE-P.**

Pg. 103, Ln. 22-23

# The parties generally agree about the terms “seamless” and “simultaneous”

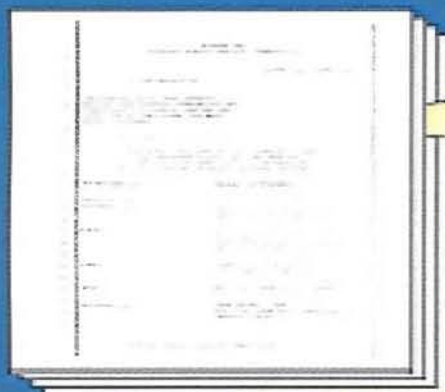

## **> What Is a “Seamless” Hot Batch Cut?**

- > By definition, hot cut “process necessarily disconnects service to the customer for a brief period of time.”**

# The parties generally agree about the terms “seamless” and “simultaneous” (continued)

## > MCI's Definition of “Seamless”

Deposition of  
Sherry Lichtenberg  
February 5, 2004

**Q. Well, what is your definition of seamless?**

\* \* \*

**A. ... My definition of seamless is to minimize the disruption to the customer in the very smallest, to the very smallest amount possible.**

Pg. 56, Ln. 7, 9-12

# The parties generally agree about the terms “seamless” and “simultaneous” (continued)

Deposition of  
David A. Nilson  
February 11, 2004

**Q. Okay. would you agree with me that a hot cut can be seamless even with a minimal disruption of service?**

**A. Absolutely, without a doubt.**

Pg. 64, Ln. 9-11

# The parties generally agree about the terms “seamless” and “simultaneous” (continued)

## > AT&T's Definition of Simultaneous

Deposition of  
Mark D. Van de Water  
February 11, 2004

**Q. Mr. Van de Water, can you define the term simultaneously as it's used in the TRO?**

\* \* \*

**Q. Could it mean multiple hot cuts taking place in the same central office in a single day?**

**A. Yes.**

# Third party testing of BellSouth's batch hot cut process

## > Direct Testimony of Mark D. Van de Water

Direct Testimony of  
Mark D. Van de Water  
December 4, 2003

- A. Pre-implementation testing should include third party "time and motion" study of the hot cut process, and third party-monitored ILEC testing using its own collocation and migration of significant numbers of its own customers through hot cuts from direct connection to its switch to its collocation equipment installed to operate as a pseudo-CLEC specifically for this test.**

# Third party testing of BellSouth's batch hot cut process (continued)

## **> BellSouth's Batch Hot Cut Process Works**

- > PriceWaterhouseCoopers (PWC) affirmed BellSouth's assertions with an independent third party audit**
- > BellSouth followed its process**
- > BellSouth's process is regional**

# **BellSouth has performed over 13,000 Hot Cuts in a 3 month period**

## **> Hot Cut Results Remain Excellent (January – May 2004)**

### **Coordinated Customer Conversions**

- > 9200+ lines converted**
- > 99.84% completed in 15 minutes; benchmark 95%**
- > Average completion time 2 min. 43 sec.**

### **Hot Cut Timeliness - % Within Interval & Average Interval**

- > 5200+ orders**
- > 99.51% met standard; benchmark 95%**

### **Percentage Provisioning Troubles in 7 days**

- > 99% of circuits had no troubles reported**
- > Measures all reports, not just actual troubles**

### **Coordinated Customer Conversions Average Recovery Time**

- > Less than 1% of circuits required recovery**

# Scalability of BellSouth's batch hot cut process

- > BellSouth's Batch Hot Cut Process is Scalable
  - > BellSouth developed force requirements assuming "worst case scenario"
    - Used highest monthly inward UNE-P volume encountered
    - Used highest monthly inward UNE-L volume encountered
    - Assumes BellSouth gains relief in EVERY market
    - Assumes BellSouth and CLECs reach agreement for CLEC to stay on BellSouth's switches in NO market
    - Assumes high rates of "churn" and customer trouble reports
  - > BellSouth can hire the required technicians and supervisors
  - > Can find, hire and train them in four (4) months

# CLECs' criticisms of BellSouth's hot cut performance are groundless

## > MCI Admits Its Testimony Regarding BellSouth's Batch Hot Cut Performance Is Speculative

Deposition of  
Sherry Lichtenberg  
February 5, 2004

**Q.** ... MCI, rather, has no firsthand evidence of BellSouth's performance with respect to hot cuts?

**A.** At this point in Florida, BellSouth – I'm sorry, MCI has no firsthand evidence of BellSouth's performance, that is correct.

\* \* \*

**Q.** Okay. So it is speculative, correct?

**A.** Yes.
